Objective

I am a passionate Computer Science student seeking an internship in Full-Stack Development or Artificial Intelligence to apply my technical skills, learn from real-world projects, and contribute to creating innovative and reliable software solution

Education

<i>Lebanese International University ,Bachelor of Science in Computer Science</i>	10/2022 – 01/2026 beirut, Lebanon
<i>CIS collage ,Accounting</i>	10/2021 – 01/2022 beirut, Lebanon

Skills

Git and GitHub:

- Experienced in using Git and GitHub to manage repositories, track changes, and collaborate efficiently with development teams.

UI/UX:

- Highly skilled in Figma, creating functional and aesthetically pleasing UI/UX designs.

Troubleshooting:

- Experienced in network troubleshooting and protocol analysis.

SQL:

- Strong knowledge of **MySQL and MongoDB** for database design and management.

software applications:

- Capable of developing and maintaining software applications using JERA, from development to deployment.

APIs Integration, Debugging & Testing :

- APIs integration, debugging, and testing ensure proper connectivity between systems, fix errors, and verify functionality for reliable application performance.

Programming Languages :

- Proficient in multiple programming languages,including Java , JavaScript, PHP, Dart, Python, C++, and SQL.

Monitoring:

- Skilled in network traffic monitoring and performance optimization.

Visual Studio :

- Proficient with **Visual Studio, Android Studio** and **Net Beans** IDE

Network accounting:

- Knowledgeable in **network accounting** and system reliability practices.

Work Experience:

- Senior Accounts Associate:

- Chamsine Bakery Khaldeh. Beirut (2023, present)

- Handled daily cash register reconciliation, ensuring 100% accuracy in cash handling and reporting.
- Assisted the store manager in preparing weekly sales and expense reports.
- Prepared end-of-day financial summaries and submitted them to management.

Projects

A Local Bus Rout system :

Created a local bus route database using Microsoft SQL Server to manage and organize transportation data efficiently.

Hotel Management System :

Developed a hotel management website using HTML, CSS, PHP, JavaScript, and MySQL for handling bookings and room management.

Real Estate Management System :

Built a real estate management platform with HTML, CSS, PHP, JavaScript, and MySQL for managing properties and client data.

AI Recruitment platform :

Developed an AI-based recruitment website using Python (Fast-API, Flask), Node.js, React, and MongoDB to automate candidate evaluation and matching.

Email and Phone Extractor :

Built a desktop NLP application using Python and ML models to extract email addresses and phone numbers from text data.

Courses

-JAVA, (*opp*)

-Data Structures and algorithms, (*DSA*)

-Artificial intelligence, (*AI*)

-NLP, (*Python*)

-INTER NETWORKING Protocol, (*Computer network*)

-Web programming Advanced, (*PHP*), (*JavaScript*), (*Node.js*), (*React*)

-Mobile Application , (*dart*), (*flutter*)

-Security (*network security*), (*cryptography*)

Languages

English:

Full Professional Proficiency

Arabic:

Native or Bilingual Proficiency
