

AI Recruitment Platform

JAMAL ALBOUKAI AND MOHAMMAD SROUR

Content

Idea 💡

The AI Recruitment Platform is a hybrid intelligent hiring system that combines Node.js, Python, and React to streamline recruitment

Evaluates candidate profiles using AI

Automatically ranks candidates based on job requirements

Helps HR teams save time and make data-driven hiring decisions

Tools & Environment 🌸

main API & business logic – (sj.sserpxE) sj.edoN **Backend:**

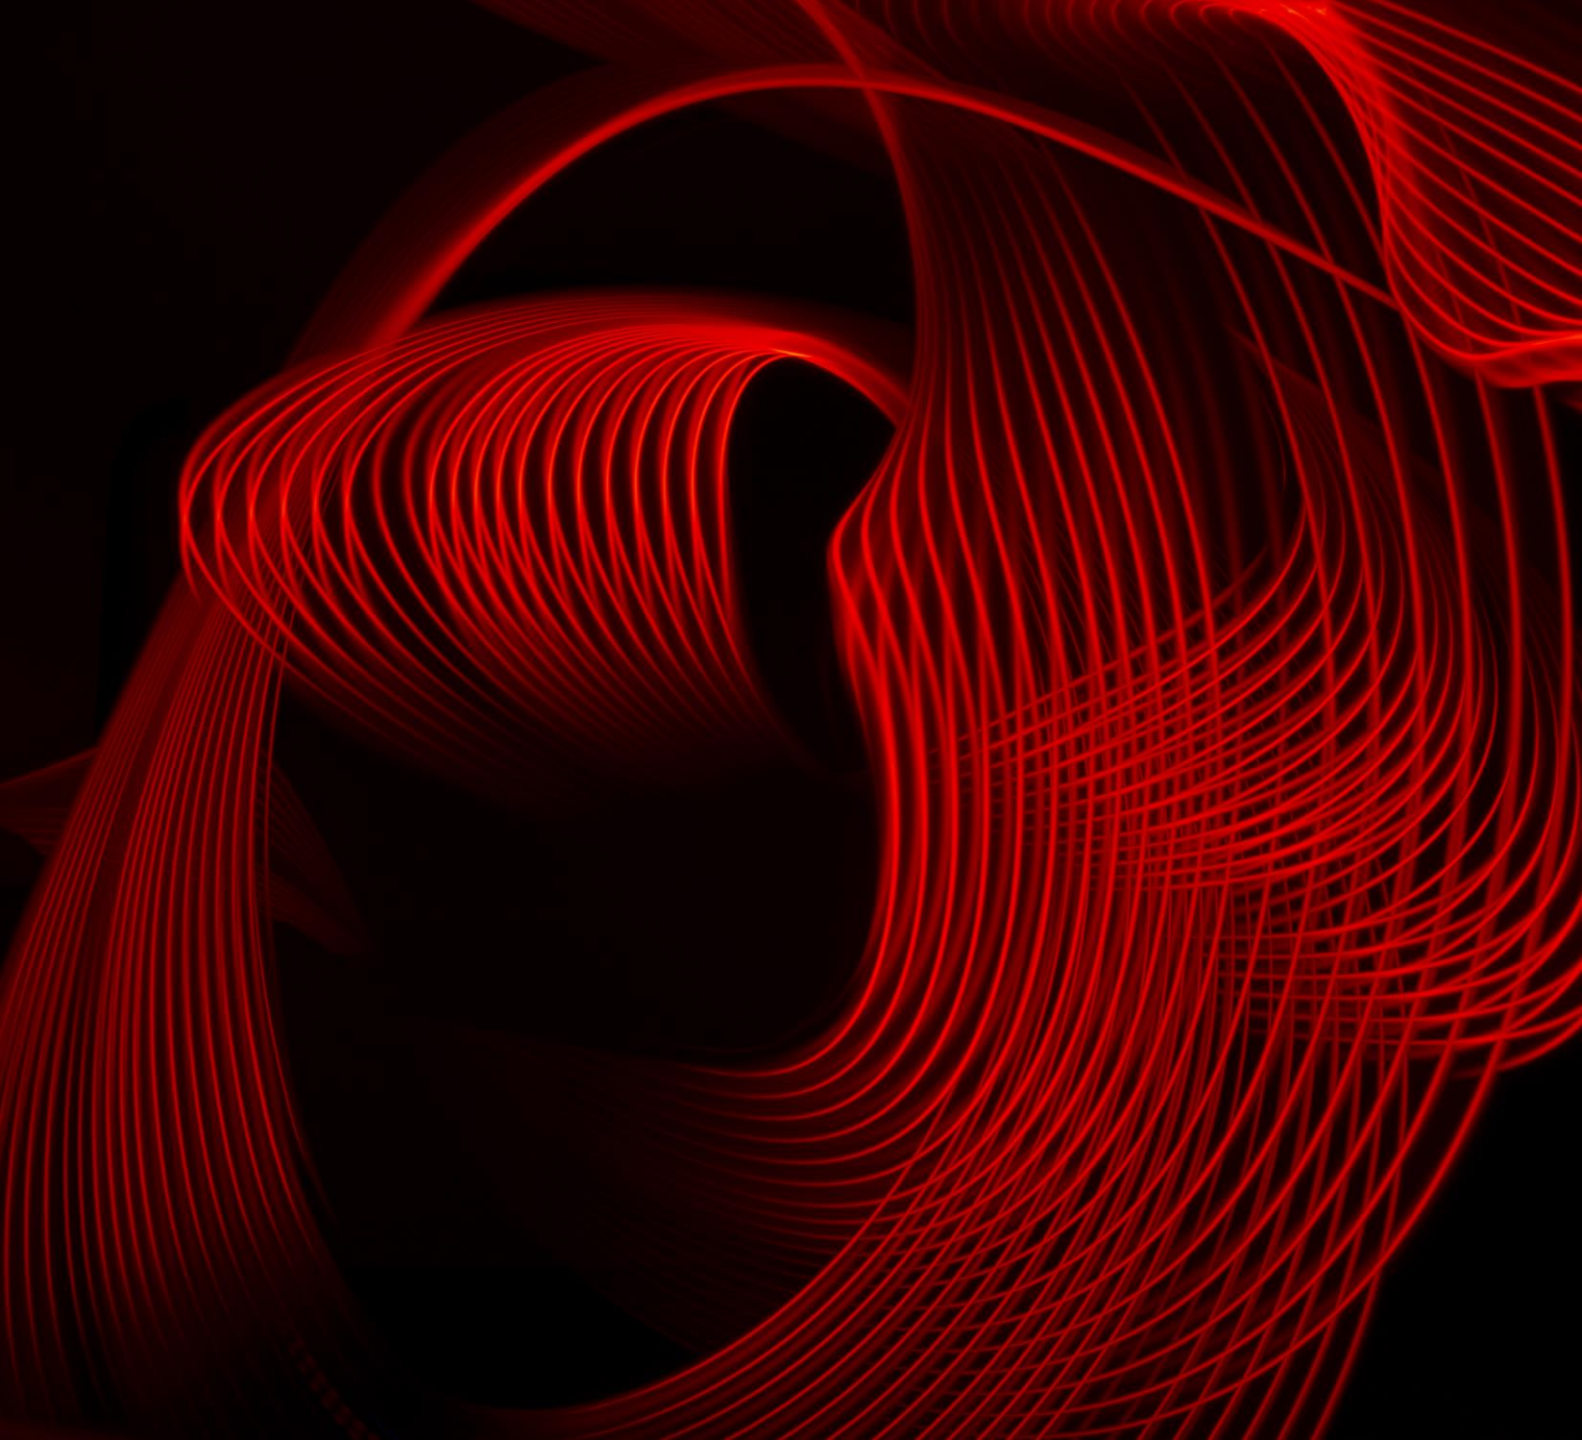

NLP and candidate –**AI Microservice:** Python (Flask / FastAPI) scoring

interactive and responsive UI – sj.tcaeR **Frontend:**

Database: PostgreSQL

Project Management: Jira (Scrum)

Development Tools: Visual Studio Code, GitHub

Importance and Key Features

:Importance 🌐

- .Automates recruitment process using AI
- .Reduces human bias in candidate selection
